On the basis of the cognitive approach, Mandelblitt (Mandelblitt, 1995) presents Cognitive Translation Hypothesis and considers two schemes for the translation of metaphors: 1. Similar mapping conditions (SMC) will obtain if no conceptual shift occurs between the metaphors of the two languages). 2. Different mapping conditions (DMP) will obtain in case a conceptual shift takes place the metaphors of two languages in presence).

In cognitive linguistics, conceptual metaphor, or cognitive metaphor, refers to the understanding of one idea, or conceptual domain, in terms of another. An example of this is the understanding of quantity in terms of directionality or the understanding of time in terms of money. A conceptual domain can be any mental organization of human experience. The regularity with which different languages employ the same metaphors, often perceptually based, has led to the hypothesis that the mapping betwe

A way in which someone uses a concrete or physical idea to better understand abstract ideas is referred to as a cognitive metaphor. It is a particular type of metaphor that goes beyond literary or poetic use, and extends into practical, every day considerations. A common example of a cognitive metaphor is the idea of "up" and "down" being used to indicate the quantity of something.
