Multicultural and Multilingual Education | American---

According to Joel Spring, "educational institutions become well-oiled machines processing children" through the use of tests and training for specific market demands. From a purely economic model, politics and culture are obscured in an attempt to understand the role human capital plays in an economy.

Joel Spring's American Education introduces readers to the historical, political, social, and legal foundations of education and to the profession of teaching in the United States. In his signature straightforward and concise approach to describing complex issues, Spring illuminates events and topics and that are often overlooked or whitewashed, giving students the opportunity to engage in critical thinking about education. In this edition he looks closely at the global context of education in the U.S. Featuring current information and challenging perspectives—with scholarship that is often cited as a primary source, students will come away from this clear, authoritative text informed on the latest topics, issues, and data and with a strong knowledge of the forces shaping of the American educational system. Changes in the 17th Edition include new and updated material and statistics on economic theories related to "skills" education and employability the conflict between a skills approach and cultural diversity political differences regarding education among the Republican, Democratic, Libertarian and Green parties social mobility and equality of opportunity as related to schooling global migration and student diversity in US schools charter schools and home schooling

Turning his distinctive analytical lens to the politics of American education, Joel Spring looks at contemporary educational policy issues from theoretical, practical, and historical perspectives. This comprehensive overview documents and explains who influences educational policy and how, bringing to life the realities of schooling in the 21st century and revealing the ongoing ideological struggles at play. Coverage includes the influence of global organizations on American school policies and the impact of emerging open source and other forms of electronic textbooks. Thought-provoking, lucid, original in its conceptual framework and rich with engaging examples from the real world, this text is timely and useful for understanding the big picture and the micro-level intricacies of the multiple forces at work in controlling U.S. public schools . It is the text of choice for any course that covers or addresses the politics of American education. Companion Website: The interactive Companion Website accompanying this text includes relevant data, public domain documents, YouTube links, and links to websites representing political organizations and interest groups involved in education.

Joel Spring's history of school polices imposed on dominated groups in the United States examines the concept of deculturalization—the use of schools to strip away family languages and cultures and replace them with those of the dominant group. The focus is on the education of dominated groups forced to become citizens in territories conquered by the U.S., including Native Americans, Enslaved Africans, Chinese, Mexicans, Puerto Ricans, and Hawaiians. In 7 concise, thought-provoking chapters, this analysis and documentation of how education is used to change or eliminate linguistic and cultural traditions in the U.S. looks at the educational, legal, and social construction of race and racism in the United States, emphasizing the various meanings of "equality" that have existed from colonial America to the present. Providing a broader perspective for understanding the denial of cultural and linguistic rights in the United States, issues of language, culture, and deculturalization are placed in a global context. The major change in the 8th Edition is a new chapter, "Global Corporate Culture and Separate But Equal," describing how current efforts at deculturalization involve replacing family and personal cultures with a corporate culture to increase worker efficiency. Substantive updates and revisions are made throughout all other chapters

This current, comprehensive history of American education is designed to stimulate critical analysis and critical thinking by offering alternative interpretations of each historical period. In his signature straight-forward, concise style, Joel Spring provides a variety of interpretations of American schooling, from conservative to leftist, in order to spark the reader's own critical thinking about history and schools. This tenth edition follows the history of American education from the seventeenth century to the integration into global capitalism of the twenty-first century to the tumultuous current political landscape. In particular, the updates focus on tracing the direct religious links between the colonial Puritans and the current-day Trump administration. Chapters 1 and 2 have been rewritten to take a closer look at religious traditions in American schools, leading up to the educational ideas of the current U.S. Secretary of Education Betsy DeVos. An updated Chapter 15 further links traditional religious fundamentalist ideas and the twentieth century free market arguments of the Chicago school of economists to President Trump's administration and the influence of the Alt-Right.

Continuing Joel Spring's reportage and analysis of the intersection of global forces and education, this text offers a comprehensive overview and synthesis of current research, theories, and models related to the topic. Spring introduces readers to the processes, institutions, and forces by which schooling has been globalized and examines the impact of these forces on schooling in local contexts. Designed for courses on globalization and education, international and comparative education, educational foundations, multicultural education, and educational policy, the text is written in a clear narrative style to engage readers in thoughtful consideration of topics discussed. Each chapter includes "Key Points" that summarize the content and suggest issues and questions for critical analysis, discussion, and debate.

Following the epic, contentious 2016 presidential election, Joel Spring's ongoing documentation and analysis of political agendas for education reflect the major political issues since 2012. Here he examines the 2016 education planks of the Republican, Democratic, Libertarian, and Green Parties, using their official platforms and other statements, speeches given by each candidate, and media reports and publications. Each party's position is linked to previous political movements in education. Spring offers an alternative agenda for American schools, including a proposed education amendment to the U.S. Constitution and replacing human capital agendas with goals emphasizing education for a long life and happiness. Taking a fresh look at the social and political forces, educational research, and ideologies shaping their educational agendas and a comparative approach, the book stimulates reflection and discussion. Updates and changes in the Sixth Edition: Betsy DeVos's education agenda supporting vouchers, free market competition and for-profit schools and its relationship to the education section of the 2016 Republican platform The important role religion and culture played in the evolution of Republican education policies after the school prayer and Bible decisions of the 1960s The influence of human capital economics on Democratic education proposals How No Child Left Behind and Democratic President Barack Obama opened doors to the growth of the for-profit education industry and investment bankers The 2016 Democratic positions on the cost of higher education and student loan debts The Democratic left as represented by the 2016 campaign of Democrat Bernie Sanders and his influence on the presidential candidate Hillary Clinton and the Democratic Party platform The education proposals of the Green and Libertarian parties

"Clear, concise, and authoritative, American Education brings issues and challenging perspectives to teacher educators' classrooms. Revised every two years, the text provides an up-to-date introduction to the historical, political, social, and legal foundations of education and to the profession of teaching in the United States."--BOOK JACKET.

The Business of Education—a comprehensive view of how education policy is made in the US and, in some cases, globally—analyzes and critiques the influence of educational policy networks in a wide range of contexts and from a variety of perspectives, including testing, college preparation, juvenile detention centers, special education, the arts, teacher evaluation systems, education of undocumented immigrants, college faculty preparation, and financial aid. A network chart in most chapters illustrates how the major political actors, mainly private philanthropic foundations, for-profit companies, government officials, and politicians involved in the network, are linked. Joel Spring, internationally renowned scholar and analyst of educational policy, situates and frames the network studies in an introduction discussing general theories of education policy networks.

In this popular text Joel Spring provocatively analyzes the ideas of traditional and non-traditional philosophies from Confucianism to human rights regarding the contribution of education to the creation of a democratic society. The goal is to explore how governments use education to control and manage their populations, and to examine forms of education that claim to free people from authoritarian control. Wheels in the Head, a critically original work now in its third edition, is widely used as a text for courses on philosophical, social, political, and historical foundations of education, and critical issues in education. Reflecting its global relevance, a Chinese translation of the second edition was published in 2005. NEW TO THIS EDITION: Expanded analysis of the use of education by authoritarian states Revisions to more clearly relate educational ideas to the theme of "wheels in the head" – a phrase coined by philosopher Max Stirner to describe the use of schools by modern governments to control their citizens. New sections on liberation education and on human rights education

In this timely, cogent analysis of trends and powerful forces shaping global educational policy today, Joel Spring focuses on how economization is making economic growth and increased productivity the main goals of schools, and the ways these goals are achieved—including measuring educational policies by their costs and economic benefits, shaping family life to ensure productive workers and high-achieving students, introducing entrepreneurship education into curricula from preschool through higher education, and increasing the involvement of economists in educational policy analysis. Close attention is given to the Organization for Economic Cooperation and Development (OECD), the World Bank, the World Economic Forum, and multinational corporations, which, as advocates of economization, want schools to focus on teaching hard and soft skills needed by the global labor market. Economization raises questions about the effects of economically driven agendas for schools: Will education policies advocated by global organizations and multinational businesses corporatize and standardize human personalities and families? What type of global worker is being sought by global organizations and multinational corporations? What education programs are supported to educate the ideal global worker? What is the ideal family life for economic growth and development? Detailing and analyzing the politics and motivations driving economization, the book concludes with an assessment of the impacts of the confluence of business interests, economic theories, governments, and educators.
