95% of Step 2 consists of clinical vignettes, and this exciting new review series presents a wealth of "guaranteed to be on the exam" clinical vignettes for Step 2 preparation to give the reader a clear-cut advantage. It is unique among case-based series in giving greater focus to high-yield information. The cases and accompanying images faithfully replicate the format of the case encounters presented in Step 2, and key points and important Step 2 "buzzwords" are highlighted for each case. The approach is simple and focused without leaving out any important information. Plus, the format gives readers the opportunity to guess the answer to the case before it is revealed and to postulate on which tests to order, what therapy to give and what to "watch out for" in the condition presented.

Prepared by residents and attending physicians, this pocket-sized loose-leaf is created in the style of Pocket Medicine by providing key clinical data for students and residents and focuses on patient care in the ob/gyn setting. Each chapter contains the brief background, differential diagnoses, clinical algorithms, and literature citations that allows a student or intern to shine during rounds by helping them quickly formulate basic management plans. Special appendices on pelvic anatomy, common ob-gyn procedures, common tests in ob-gyn, and drugs in ob and breastfeeding, may be especially useful references. Because ob-gyn involves so much interdisciplinary learning, a carefully prepared cross-referenced index is included to help assist in locating information quickly. Pocket ObGyn offers a handy summary of key clinical information designed to form the basis of an individual's pocket notebook or to be integrated into one's own notebook.

Following the organization of Dr. Marc Sabatine 's bestselling Pocket Medicine manual, Pocket Medicine High-Yield Board Review is an all-new, must-have study guide for advanced medical students; for residents in internal medicine, family medicine, and primary care; and for practitioners.
