Traffic Highway and Transportation Engineering. Highway engineering is an engineering discipline branching from civil engineering that involves the planning, design, construction, operation, and maintenance of roads, bridges, and tunnels to ensure safe and effective transportation of people and goods. Highway engineering became prominent towards the latter half of the 20th Century after World War 2.

This programme has two pathways: Sustainable Highways or Sustainable Railways. Sustainability is more than a badge – assessing condition, assessing sustainability, diagnosis of faults, risk assessment and decision-making are pervasive features of all the engineering application topics covered by the courses, while the more fundamental topics in the programme provide tools to achieve these.
