Yes Howard did have a lobotomy. But it didn’t seem to change him in any way and did not alter the course of the story so what you have is a fairly rudimentary memoir of a guy with behaviour issues and a difficult relationship with his step mum. It’s more a story of how the medical profession and the state dealt with that sort of thing back in the 60’s. I gave up around page 100. Read more ...

At twelve, Howard Dully was guilty of the same crimes as other boys his age: he was moody and messy, rambunctious with his brothers, contrary just to prove a point, and perpetually at odds with his parents. Yet somehow, this normal boy became one of the youngest people on whom Dr. Walter Freeman performed his barbaric transorbital—or ice pick—lobotomy.Abandoned by his family within a year ...

My thanks to Howard Dully to have the courage to expose the good, the bad and the ugly of his life. It was a well balanced account of a life disrupted in the worst way. For someone to take a little boy and treat him so badly, then to try to destroy him is heartbreaking. I am glad Howard has found love and compassion in his adult life.

Writing a memoir means you ’ re author and subject, researcher and storyteller, narrator and audience. That ’ s a lot to ask of any writer, though a good way to begin the challenge of writing a memoir is to start a list of the most memorable events of your life. Don ’ t start on the actual book manuscript until you have at least a page filled with things that seem worthy of sharing — moments ...
