International Parkinson and  
Movement Disorder Society

Parkinson ' s disease (PD) is called a movement disorder because of the tremors, slowing and stiffening movements it can cause, and these are the most obvious symptoms of the disease. But Parkinson ' s affects many systems in the body. Its symptoms are different from person to person and usually develop slowly over time.

Most psychogenic movements are  
considered involuntary – performed  
without conscious awareness or effort.  
They can mimic organic movement  
disorders, such as tremor, dystonia,  
myoclonus, parkinsonism, tics and  
paroxysmal dyskinesias.
