Here is an important list of rules to follow: The carboxyl group takes precedence over alkyl groups and halogen substituents, as well as double bonds, in the numbering of the parent chain. If the carboxyl group is attached to a ring the parent ring is named and the suffix -carboxylic acid is added.

~~IUPAC Rules~~

The anion is named by taking the elemental name, removing the ending, and adding "-ide." For example, F⁻¹ is called fluoride, for the elemental name, fluorine. The "-ine" was removed and replaced with "-ide." To name a compound, the cation name and the anion named are added together. For example, NaF is also known as sodium fluoride.

rule types and a set of syntactic templates from which unambiguous natural language rule statements of each type can be generated. A user guide to the SBVR specification, it explains how to develop an appropriate business vocabulary and generate quality rule statements using the appropriate templates and terms from the vocabulary. The resulting rule statements can be reviewed by business stakeholders for relevance and correctness, providing for a high level of confidence in their successful implementation. A complete set of standard templates for rule statements and their component syntactic elements A rigorous approach to rule statement construction to avoid ambiguity and ensure consistency A clear explanation of the way in which a fact model provides and constrains the rule statement vocabulary A practical reader-friendly user guide to the those parts of the SBVR specification that are relevant to rule authoring

Medicinal plants are important for human health. These plants have been used from the prehistoric times to present day. These plants based medicines are consumed in all civilizations. It is believed that the herbal medicine can give good effect to body without causing side effects to human life. Medicinal plants are not only a major resource base for the traditional medicine & herbal industry but also provide livelihood and health security to a large segment of Indian population. Medicinal plants constitute a large segment of the flora, which provide raw materials for use by various industries. They have been used in the country for a long time for their medicinal properties. These plants are staging a comeback and herbal renaissance is happening all over the globe. The herbal medicines today symbolise safety in contrast to the synthetics that are regarded as unsafe to human and environment. Although herbs had been priced for their medicinal, flavouring and aromatic qualities for centuries, the synthetic products of the

modern age surpassed their importance, for a while. However, the blind dependence on synthetics is over and people are returning to the naturals with hope of safety and security. Besides, the usage of medical plants has been increasing as an important role that can support the economic system. Ayurveda, the well known indigenous system of medicine, is still regarded as a well organised traditional health care for large sections of rural as well as urban population of India. The medicinal plants sector at present is not well organised and needs special attention. Although different Ministries and Department in the Government sector and NGOs and individuals in the private sectors are making their efforts in different directions, yet there is a need to co ordinate and systematize. The medical plants for health are used as herbal treatments and therapies that can be new habits for culture. The market is very competitive and could easily be oversupplied. This book basically deals with therapeutic potential of medicinal plants, medicinal plants priorities in Indian medicines diverse studies and implications, recent developments of some natural products, production and management of medical plants on farms, classification, identification and naming of medicinal plants, pests and pest management in medicinal plants, Ajmalicine (Raubasine): a medicinally important alkaloid from *catharanthus roseus* (*vinca rosea*), cultivation of rutin bearing eucalyptus species, iridoids and secoiridoids of the genus *swertia*, studies on medico ethnobotany, tropical periwinkle, tulsi, etc. The present book covers cultivation practices of selected commercially important medicinal plants with their processing details and uses. The book is very resourceful for

Comparison of Gulf International Arbitration Rules has been inspired by its sister publications, Comparison of Asian International Arbitration Rules and Comparison of International Arbitration Rules, which were prepared by Simpson Thacher & Bartlett LLP and published by Juris Publishing in 2003 and 2008 respectively. This volume sets forth the main arbitration rules and regulations available in the Middle East region and provides a basis of comparison on their efficiency and cost-effectiveness. Due to the great number of arbitration institutions that have been forming across the Middle East over the past couple of decades the present overview is confined to the most commonly-used sets of rules in the Gulf region: the Arbitration Rules of the 2007 Dubai International Arbitration Centre (the "DIAC Arbitration Rules"), the 2008 Arbitration Rules of the Dubai International Financial Centre-London Court of International Arbitration (the "DIFC-LCIA Arbitration Rules"), the 1993 Arbitration Regulations of the Abu Dhabi Commercial Conciliation and Arbitration Centre (the "ADDCAC Rules"), the 2006 Arbitration Rules of the Qatar International Centre for Commercial Arbitration (the "QICCA Arbitration Rules"), the 1994 Arbitration Rules of the Gulf Cooperation Council (GCC) Commercial Arbitration Centre (the "GCC Arbitration Rules") and the 2009 Arbitration Rules of the American Arbitration Association/Bahrain Chamber for Dispute Resolution (the "AAA/BCDR Arbitration Rules"). Due to their increasing prominence for ad hoc arbitration in the region, the

2005 Arbitration Rules of the Qatar Financial Centre (the “QFC Arbitration Rules”) and the 1976 Arbitration Rules of the United Nations Commission on International Trade Law (UNCITRAL) (the “UNCITRAL Rules”) including recent 2010 revisions are included. Full sets of these rules are appended to the comparative chart that makes up the core of this publication. There is also a comparative table on costs and fees to give the reader a clear idea of filing, administrative and arbitrators’ costs under the various arbitration rules. The comparative entries in the chart on parallel provisions of the various sets of arbitration rules follows a logical self-explanatory sequence, mapping the course of an arbitration from the commencement of the proceedings to the issuance of the final award. The first two headline entries on the “arbitration clause” and the “arbitral institution” are meant to provide relevant framework information and to assist the client in swiftly identifying the standard wording of an arbitration clause under the relevant rules (to avoid any debilitating pathologies in the famous midnight drafting process of commercial contracts) as well as the main services and functions provided by the arbitration institution concerned. The arrangement of the information and data provided in the various entries is meant to facilitate consultation of the rules on particular comparative aspects, which we hope is further assisted by the detailed table of contents contained at the very beginning of the volume.
