Techniques and Principles in Language Teaching has influenced the way thousands of teachers have taught English. This classic guide to developing the way you teach has been an essential resource to new and experienced teachers worldwide, and is now in its third edition. Each chapter focuses on a different teaching approach, describing it being used in the classroom, analyzing what happened, and helping you think how you could apply it to your own teaching. New features of the third edition include: a new discussion on the political dimensions of language teaching, a new digital technology chapter, and extended coverage of content-based and task-based approaches. On this site you will find additional resources, including author videos in which Diane Larsen-Freeman and Marti Anderson talk about the background to the book and new innovations in language teaching which are discussed in the third edition.

ESL/EFL teachers and trainees will welcome this methodology text, which considers all practical classroom techniques and activities in terms of solid foundation stones of research on second language acquisition. -- Readers develop an overall approach to language teaching from which their classroom practices can emerge. -- The text has user-friendly, readable prose, interactive end-of-chapter exercises for discussion and action, and end-of-chapter recommendations for further reading.

This book introduces readers to the concept of task-based language teaching (TBLT), a learner-centred and experiential approach to language teaching and learning. Based on the premise that language learners can enhance their second language acquisition (SLA) through engagement in communicative tasks that compel them to use language for themselves, TBLT stands in contrast to more traditional approaches. Accessible and comprehensive, this book provides a foundational overview of the principles and practice of TBLT and demystifies what TBLT looks like in the classroom. Complete with questions for reflection, pedagogical extensions for application in real classrooms and further reading suggestions in every chapter, this valuable and informative text is vital for anyone interested in TBLT, whether as students, researchers or teachers.

This new edition surveys the major approaches and methods in language teaching.

What general principles should inform a socioculturally sensitive pedagogy for teaching English as an International Language and what practices would be consistent with these principles? This text explores the pedagogical implications of the continuing spread of English and its role as an international language, highlighting the importance of socially sensitive pedagogy in contexts outside inner circle English-speaking countries. It provides comprehensive coverage of topics traditionally included in second language methodology courses (such as the teaching of oral skills and grammar), as well as newer fields (such as corpora in language teaching and multimodality); features balanced treatment of theory and practice; and encourages teachers to apply the pedagogical practices to their own classrooms and to reflect on the effects of such practices. Designed for pre-service and in-service teachers of English around the world, *Principles and Practices for Teaching English as an International Language* fills a critical need in the field.

This book provides a perspective on the application of machine learning-based methods in knowledge discovery from natural languages texts. By analysing various data sets, conclusions which are not normally evident, emerge and can be used for various purposes and applications. The book provides explanations of principles of time-proven machine learning algorithms applied in text mining together with step-by-step demonstrations of how to reveal the semantic contents in real-world datasets using the popular R-language with its implemented machine learning algorithms. The book is not only aimed at IT specialists, but is meant for a wider audience that needs to process big sets of text documents and has basic knowledge of the subject, e.g. e-mail service providers, online shoppers, librarians, etc. The book starts with an introduction to text-based natural language data processing and its goals and problems. It focuses on machine learning, presenting various algorithms with their use and possibilities, and reviews the positives and negatives. Beginning with the initial data pre-processing, a reader can follow the steps provided in the R-language including the subsuming of various available plug-ins into the resulting software tool. A big advantage is that R also contains many libraries implementing machine learning algorithms, so a reader can concentrate on the principal target without the need to implement the details of the algorithms her- or himself. To make sense of the results, the

book also provides explanations of the algorithms, which supports the final evaluation and interpretation of the results. The examples are demonstrated using realworld data from commonly accessible Internet sources.

In the present book, *How to Win Friends and Influence People*, Dale Carnegie says, “ You can make someone want to do what you want them to do by seeing the situation from the other person ’ s point of view and arousing in the other person an eager want. ” You learn how to make people like you, win people over to your way of thinking, and change people without causing offense or arousing resentment. For instance, “ let the other person feel that the idea is his or hers ” and “ talk about your own mistakes before criticizing the other person. ” This book is all about building relationships. With good relationships, personal and business successes are easy and swift to achieve. *Twelve Ways to Win People to Your Way of Thinking*

1. The only way to get the best of an argument is to avoid it.
2. Show respect for the other person's opinions. Never say "You're wrong."
3. If you're wrong, admit it quickly and emphatically.
4. Begin in a friendly way.
5. Start with questions to which the other person will answer yes.
6. Let the other person do a great deal of the talking.
7. Let the other person feel the idea is his or hers.
8. Try honestly to see things from the other person's point of view.
9. Be sympathetic with the other person's ideas and desires.
10. Appeal to the nobler motives.
11. Dramatize your ideas.
12. Throw down a challenge.
