## Unsolved Problems In

Since the Renaissance, every century has seen the solution of more mathematical problems than the century before, yet many mathematical problems, both major and minor, still remain unsolved. These unsolved problems occur in multiple domains, including physics, computer science, algebra, analysis, combinatorics, algebraic, differential, discrete and Euclidean geometries, graph, group, model, number, set and Ramsey theories, dynamical systems, partial differential equations, and more.

Unsolved Problems in ...

Yes. In my view the problem of “ The Fifth Postulate ” is still unsolved.

Mathematicians have taken the easiest path, they have just ignored this problem in desperation and have created all sort of non-Euclidean geometries denigrating the importance of the Euclidean geometry to the lowest level.

The Millennium Problems were seven of the hardest unsolved math problems in the world, paired with a prize. Solve one and win a million bucks. If only Dr. Evil had a degree in math. So far, only one of these eggs has been cracked, the Poincaré Conjecture, which was proven by Grigori Perelman in 2002 after standing unproven for 98 years.
